Therapeutic Video Game Recommendations
How to Use This Guide

The purpose of this guide is to recommend therapeutic video games for children based on their symptoms. The games recommended in this guide were curated by researchers at EEDAR, a market-leading video game research firm, in collaboration with mental health researchers at UCSD.

This guide was designed as a quick reference to help caretakers quickly select games for their patients. Caretakers can reference the category that best fits the symptoms of the patient and select one of the games listed.

When selecting an appropriate game, the user should first select the appropriate symptom and age category of the child, and then select a title based on the available gaming platforms at the facility. Note: Virtual Reality Games are currently not recommended by the manufacturer for children under the age of 12.

Methodology

EEDAR operates the largest video game attribute database in the world containing over 170 million game facts.

To create the recommendations in this guide, EEDAR collaborated with mental health researchers to create a hierarchy of over one hundred game features related to positive health. EEDAR then classified thousands of video games based on these features.

EEDAR then collaborated with mental health researchers to determine which features should correspond to which symptom groups.

EEDAR’s proprietary recommendation technology was used to select the titles recommended in this guide.

Honorable Mention

Good games specifically designed for a therapeutic purpose.

I, Hope (General Action)
A beautiful coming of age adventure story about a young girl named Hope, whose town has been taken over by Cancer. Available on Xbox One and PC.

Symptom: Pain

**Works By:** Distracting from physical pain or the symptoms of chronic conditions.

The best games for this category have easy-to-learn game mechanics and rewarding, short game sessions. The quick pace of gameplay in Platformers, Arcade Racers and fast-action Puzzle games can engage a player’s mind and body in a way that is especially effective for pain management. Dynamic visuals and high-energy sound design can also be helpful to distract from discomfort.

- Streets of Rage 2 (Beat ‘em Up)
- Hungry Shark Evolution (General Action)

**Mobile Android**
- Tap Tap Revenge 4 (Rhythm)
- Fist of Awesome (Beat ‘em Up)
- Asphalt 8: Airborne (Action Racing)
Symptom: Boredom (Short-Term Stay)

**Works By:** Entertaining players in waiting rooms or short-stay situations.

Games for short-term boredom are focused experiences that are smaller in scope and can be played quickly, in genres such as Racing, Fighting, and Arcade-style games. They are often designed to be replayed many times over, with rules that are easy to understand but difficult to master. Ideal titles for this symptom allow a player to start and stop frequently, with little to no persistence between play sessions.

Mobile iOS
- Plants vs Zombies (Tower Defense)
- Crazy Taxi (Action Racing)
- Street Fighter IV (Fighting)

Mobile Android
- True Skate (Skateboarding)
- Temple Run 2 (Endless Runner)
- Threes! (Number Games)
Symptom: Boredom (Long-Term Stay)

Works By: Providing more substantial entertainment for long stays or recurring patient recreation.

Titles recommended for this category are designed to hold a player’s attention over many play sessions. They emphasize story more than many other titles, and have more nuanced mechanics that may take a while for players to fully understand. Games for Long-Term Boredom are more immersive and (as the category name implies) require longer sessions than most of the other recommendations in this guide. More complex story-driven Action and Puzzle games fit in well here, as well as RPGs and Strategy titles.

**Recommended Games for 12 and Under**

**Nintendo 3DS**
- Mario & Luigi: Dream Team (Classic RPG)
- The Legend of Zelda: Ocarina of Time 3D (General Action)
- Pokemon: Moon/Sun (Classic RPG)

Playstation VR
- Wayword Sky (General Puzzle)
- Windlands (Action Platformer)
- Psychonauts: In the Rhombus of Ruin (General Narrative)

Mobile iOS
- Star Wars: Knights of the Old Republic (Action RPG)
- Final Fantasy VI (Classic RPG)
- XCOM: Enemy Unknown (Turn Based Strategy)

Mobile Android
- Final Fantasy VI (Classic RPG)
- Chrono Trigger (Classic RPG)
- Knights of Pen & Paper +1 (Classic RPG)
Works By: Relieving discomfort and stress and promoting a peaceful mood.

For players prone to anxiety, many games can unfortunately cause more discomfort than relief. The games curated for this category avoid the high-intensity play that define Arcade and Action games and instead focus on gentler experiences that engage a player’s critical thinking skills and creativity. Many of them feature soothing music and pleasant visuals to help relax the player. Casual Simulation titles and Puzzle games without time constraints are great choices here.

### Recommended Games for 12 and Under

**Symptom: Anxiety / Hyperactivity**

- **Nintendo 3DS**
  - Nintendogs + Cats: Golden Retriever (Role Simulation)
  - Pushmo (General Puzzle)
  - Animal Crossing: New Leaf (Role Simulation)

- ABZU (Action Platformer)

Playstation VR
- Wayword Sky (General Puzzle)
- Windlands (Action Platformer)
- Eagle Flight (Action Racing)

Mobile iOS
- Peggle (Classic Arcade Style)
- Monument Valley (General Puzzle)
- World of Goo (Physics Puzzle)

Mobile Android
- Peggle (Classic Arcade Style)
- Monument Valley (General Puzzle)
- World of Goo (Physics Puzzle)
Works By: *Improving mood and discouraging negative thought patterns.*

These games in the Racing, Matching Puzzle, and Action genres have been selected for both their rewarding gameplay and pleasant overall atmosphere. They feature relatable, charming characters and forgiving difficulty options to keep players from becoming discouraged. Immediacy of gameplay is also a key factor; for players in emotional distress, being engaged by a task can help to alleviate feelings of dread or regret.

### Recommended Games for 12 and Under

**Nintendo 3DS**
- Nintendogs + Cats: Golden Retriever (Role Simulation)
- Super Mario 3D Land (Action Platformer)
- Poochy & Yoshi’s Woolly World (Arcade Platformer)

**Nintendo Switch**
- Super Mario Party (Mini Game(s)/Party Game)
- Pokemon: Let’s Go Pikachu! (Classic RPG)
- 1-2-Switch (Mini Game(s)/Party Game)

- Job Simulator (Role Simulation)
- Fruit Ninja VR (Gallery Shooter)

**Mobile iOS**
- Super Mario Run (Endless Runner)
- World of Goo (Physics Puzzle)
- Plants vs. Zombies (Tower Defense)

**Mobile Android**
- Super Mario Run (Endless Runner)
- World of Goo (Physics Puzzle)
- Plants vs. Zombies (Tower Defense)
Symptom: Cognitive Impairment

Works By: Offering low-impact entertainment for medicated or cognitively inhibited patients.

Recommendations for this category offer simplified mechanics and require less of the player than other titles while still remaining interactive and rewarding. These games place an emphasis on play and experimentation as opposed to winning or losing. With intuitive controls and little to no time constraints, players can learn and enjoy the games below regardless of their skill level. Non-linear games without mandatory goals and those that encourage the player to explore are recommended.

Recommended Games for 12 and Under

- **Nintendo 3DS**
  - Nintendogs + Cats: Golden Retriever (Role Simulation)
  - Colors! 3D (Painting)
  - Pokemon Art Academy (Painting)

- **Nintendo Switch**
  - Snipperclips: Cut it Out, Together! (Physics Puzzle)
  - Minecraft: Nintendo Switch Edition (Action Builder)
  - World of Goo (Physics Puzzle)

**Mobile Android**
- Zen Bound 2 (General Puzzle)
- Osmos HD (Physics Puzzle)
- Flick Home Run! Baseball Game (Mini-Game(s)/Party Games)
About Child's Play

Child’s Play is a charitable organization that donates toys and games to children’s hospitals all over the world. It was founded in 2003 by Mike Krahulik and Jerry Holkins, authors of the popular computer and video games-based webcomic Penny Arcade. Child’s Play seeks to improve the lives of children in hospitals and domestic violence shelters through the generosity and kindness of the video game industry and the power of play. Since its creation, it has raised over 50 million dollars for this cause, benefiting over 170 hospitals and 150 domestic violence shelters worldwide.

About EEDAR

Founded in 2006 by video game industry veterans and acquired in 2016 by the NPD Group, EEDAR is the largest specialty video game research firm in the world. Leveraging a proprietary database of over 165 million internally researched data points from more than 125,000 physical and digital video game products, EEDAR is the sole provider of end-to-end integrated data analysis solutions that allow for the examination of every factor influencing the success of past, present, and future video game titles.
